

SCHEDULING ABBREVIATED TERMS

(A) Add - An operation added to the current schedule.

(X) Cancellation - A termination after some range time has been expended. It will not reappear under same operation number. Transferred to historical file.

(C) Complete - A successful termination of an operation. Transferred to historical file.

(E) Extension - Used to extend the end of the window after start of an operation.

(F) Forecast - A scheduled operation in the forecast.

(I) Indefinite - A scheduled operation is suspended; rescheduling information is pending. Rescheduling date and time is unknown.

(D) Delete - A termination before any range time is used. Transferred to historical file.

(R) Reschedule - A change of date and/or time of an operation that is on the schedule prior to the start of setup.

(S) Scrub - Termination of an operation after some range time has been expended. May reappear with same operation number.

U) Update - A change of operation resources or requirements that do not affect the scheduled date or time.

Associated Operation— An operation conducted to support the objective of some other major milestone event or launch-related activity as its basic source. Associated Operations are charged to the same account (JON) they are linked to.

Related Operation— An operation conducted to achieve an objective not associated to, but dependent upon, a major operation for meeting planned objectives. Related operations are linked to certain operations but charged to a different JON.

Symbiotic Operation— An association between two or more different programs running concurrent operations that may or may not benefit each other (i.e., MDR concurrent with an F-16 operation). Symbiotic operations are charged to a different account (JON) than their linked mission.
